

Media

Media focuses upon learning to use major software package including Sketchup and Photoshop. The skills are very much in demand in the workplace and will grow with the increasing use of three dimensional printers. Throughout the year pupils learn how to use Sketchup to create a realistic house with doors, windows and landscaping. They learn basic Photoshop skills including how to create content from scratch and identify fake photos (forensics). There is also the opportunity for music making using Garage Band and three dimensional printing.
